SUMMARY

Aspiring AWS Cloud & DevOps Engineer with hands-on experience in AWS, Docker, Kubernetes, Jenkins, and GitHub Actions. Skilled in provisioning and managing cloud infrastructure using AWS and Terraform, containerizing applications with Docker, and deploying workloads on Kubernetes/Amazon EKS. Experienced in building CI/CD pipelines using Jenkins and GitHub Actions to automate application and infrastructure deployments. Familiar with Git, Linux, IAM, VPC, EC2, S3, EKS, and EFS, with a strong interest in cloud infrastructure automation, containerization, and DevOps practices.

EDUCATION

- Bachelor of Technology – Electronics & Telecommunication Engineering — CGPA: 7.0 | 2026
  TPCT'S College of Engineering, Dharashiv
- Higher Secondary Education (12th) — Percentage: 82.00% | 2022
  Shripatrao Bhosale Highschool, Dharashiv
- Secondary School Education (10th) — Percentage: 87.00% | 2020
  Shripatrao Bhosale Highschool, Dharashiv

SKILLS

- Cloud — AWS – EC2, VPC, IAM, S3, EKS, EFS, CloudWatch, ALB
- Infrastructure as Code — Terraform
- Containers & Orchestration — Docker, Kubernetes, Amazon EKS,
- CI/CD — Jenkins, GitHub Actions
- Version Control — Git, GitHub
- Operating Systems — Linux, Windows
- Networking**:** VPC, Subnets, Route Tables, Internet Gateway, NAT Gateway, Security Groups
- Scripting — Python
- Monitoring — Prometheus, Grafana

PROJECTS

1. AWS EKS Cluster using Terraform

- Provisioned an AWS VPC, Amazon EKS cluster, IAM roles, and worker nodes using Terraform.
- Configured AWS VPC CNI for Kubernetes networking.
- Implemented Kubernetes NetworkPolicies to control pod-to-pod ingress and egress traffic.
- Integrated the Amazon EFS CSI Driver to provide persistent storage for Kubernetes workloads.
- Technologies: AWS, Terraform, EKS, Kubernetes, EFS, VPC CNI, IAM

2. AWS Infrastructure Automation using Terraform & GitHub Actions

- Provisioned and managed AWS infrastructure using Terraform Infrastructure as Code (IaC).
- Configured Amazon VPC, public/private subnets, route tables, Internet Gateway, and NAT Gateway.
- Provisioned and configured EC2 instances and Security Groups using Terraform.
- Configured IAM roles and policies for secure AWS resource access.
- Automated Terraform init, plan, and apply using a GitHub Actions CI/CD pipeline.
- Configured AWS authentication securely using GitHub Secrets.
- Used Git and GitHub for version control and infrastructure automation.
- Technologies: AWS (VPC, EC2, IAM, Security Groups, S3), Terraform, GitHub Actions, Git, Linux

3. Docker Image Build & Push using GitHub Actions

- Containerized a React application using Docker.
- Created a GitHub Actions CI/CD workflow to automatically build Docker images.
- Configured Docker Hub authentication using GitHub Secrets.
- Automated Docker image publishing to Docker Hub.
- Technologies: Docker, GitHub Actions, Docker Hub, Git, GitHub

4. Student & Employee Attendance Management System

- Developed a Python-based attendance management system using face recognition.
- Captured and stored student and employee images for face recognition.
- Implemented automatic person identification and attendance recording in an Excel sheet.
- Automated attendance recording to reduce manual effort and improve accuracy.
- Technologies: Python, OpenCV, Face Recognition, Excel
